Personally I think there were actually several waves of settlement. In Questioning the Answers: Re-Solving Fundamental Problems of the Early Upper Paleolithic, edited by M. Here we report a consistent set of stratified radiocarbon ages on freshly excavated charcoal from Kebara Cave, Mt.

Mae Goder

This, with the technology of the osseous raw material exploitation, the presence of antler simple-base points, and some lithic typotechnological features, suggest a link between the symbolic spheres of the Levantine and the European Aurignacian cultural entities.

The Middle Paleolithic of the Levant

Our results suggest that the time separating the occupations by the two accumulators was short enough so that the bones, discarded by the men, conserve nutritive value for the hyenas when they came for scavenging. By drawing upon classic and recent research in the field, it reflects current state-of-the-art understandings of social and cultural changes based on the interrelationships among different societies.

Yossi Zaidner

These include whether this record is characterized by gradualism or by punctuated changes; how different terminologies for example, the Middle Stone Age and the Middle Paleolithic affect interpretations; at what point a lithic assemblage is classified as Upper rather than Middle Paleolithic; and if the lithic transitions from the Middle to Upper Paleolithic for both modern humans and Neandertals are similar or different. In addition, numerous models on the hunting strategies evolution from the Middle to the Upper Paleolithic in Europe are at least in part based on south-west France ,,,.

radiocarbon dating of the transition from the Middle to the Upper by N R. Rebollo, S Weiner et al.

The heavy $\delta^{18}\text{O}$ values in carbonates point to cooler climatic conditions than those that prevailed during the preceding short, warm episode between 58 and 49 ka. In sum, if Les Cottés has always been used as a campsite, the number of activities undertaken there and the duration of site occupation evolved.

Yossi Zaidner

Cannibalism might have been necessitated by lack of adequate foodstuffs.

The Middle

Such similarity also supports some contribution of European Aurignacians groups to the local cultural entities, intermingling with the local material culture features. The Middle Paleolithic broadly spanned from 300,000 to 30,000 years ago.
