## The SLP's Guide to Language Screenings

We will use GRADEpro 2014 to prepare the 'Summary of findings' table s , as needed. Similarly, a child with an expressive grammatical disorder may produce short, incomplete sentences that lack the grammatical endings or structures necessary to express ideas clearly or completely.

BILINGUAL LANGUAGE LEARNING Children growing up in a bilingual environment will typically have some degree of mixing of the two languages, which decreases with a growth in language development.

## Speech and Language Delay in Children

NOTE: Data in this figure are for the 50 states, the District of Columbia, the Bureau of Indian Education, American Samoa, the Federated States of Micronesia, Guam, the Northern Marianas, Puerto Rico, the Republic of Palau, the Republic of the Marshall Islands, and the U.

## Language and Speech Disorders in Children

And these topics are discussed as early as the first-grade curriculum.

## Key Findings: Children Born with Neonatal Abstinence Syndrome (NAS) May Have Educational Disabilities

Still other criterion-referenced measures involve more global judgments of whether the child's language abilities are generally commensurate with those of peers, such as asking parents whether they are concerned about their child's ability to talk or understand as well as other children of the same age. Studies indicate that they may have adverse effects upon school achievement ; ; ; .

## Language impairment affects school performance

Aging Adults The SLP helps maximize independent functioning in aging adults. Dysphagia, 23 1 , 88—97.
