The style is unblushing or sophomoric scissors-and-paste: long quotations—often interesting but not necessarily important—from contemporary sources parliamentary debates, sermons, plays, letters and histories held together by outright dubious assertions and highly debatable interpretations.

It also encourages scholarship at the intersections of cultural and intellectual history -- for example, the history of the book and of visual culture. #### **Pioneers of Enslavement and the Slave Trade in Africa**

It is committed to encouraging diversity in regional coverage, chronological range, and methodological approaches. It contains nothing about slavery, nothing about the process of emancipation in the American slave societies, and extremely little about the changing attitudes toward slavery and race either in Europe or overseas.
