Proverbs 11:1 Dishonest scales are an abomination to the LORD, but an accurate weight is His delight.

He particularly targeted television, with advertising by coal companies during news programs and chat shows now being modelled on tobacco advertisements of the 1980s.

And while it is regrettable that so many Palestinians have died, what would Hart suggest — that Israel wait another 3 years until their death count is hire to retaliate? If an idea fails to survive in the community of experts, its public profile should diminish in proportion to its failure to generate consensus within that community. This typically involves putting biased industry organizations against real scientific or medical organizations, a single flawed study against the bulk of the scientific literature or making false moral equivalences in an effort to downplay genocide and mass murder. It is easy to counter false balance by exposing the non-credible side as unscientific or flawed and highlighting the fallacies are often accompany false balance arguments.

This argument is generally built around the idea that the middle point between two extremes is equal parts of each side and therefore equally acceptable to both sides; but as the saying goes, half a kitten is not half as cute, it's a bloody mess. The inability of Israel to get security through targeted assassination, air strikes, walls, and ground invasions suggest they should try a new approach.

The distorting reality of 'false balance' in the media

Journalists may present evidence and arguments out of proportion to the actual evidence for each side, or may even actually suppress information which would establish one side's claims as baseless. This is so, but to use a consensus as evidence of error is fallacious reasoning. What if the story is about a debate on government actions to combat global warming? There are multiple ways to do this depending on the specific context.
