Deaths weekly in England and Wales, provisional

These two datasets reflect different versions of the database. When the registrar has signed the entry in space 16 he shall add his official description.

Companies House

Analysis in this bulletin includes deaths from week 1 2020 through to week 3 2021, to ensure full coverage of the ongoing coronavirus COVID-19 pandemic.

NHS Covid

EU Exit Regulations 2018 SI 2018 No. The database was updated annually by OPCS and its successor, the Office for National Statistics ONS , to include additional years of data.

General Office: of Births, Marriages and Deaths surrendered to the Non

Civil marriages in the presence of justices of the peace introduced, became void in 1660. PART XII CORRECTION OF ERRORS Time when entry is complete 71. Deaths data in the Historic Deaths tables for the period 1901-1958 was derived from published sources.

General Office: of Births, Marriages and Deaths surrendered to the Non

Oxford, United Kingdom: Oxford University Press. The most significant difference is that where the ICD employed a 3-digit code, a '0' was added at the end in the dataset to ensure that all codes had 4 digits.

NHS Covid

Of the 5,696 deaths that involved Influenza and Pneumonia, 330 had this recorded as the underlying cause of death 5.

General Office (GRO)

Definitions of COVID-19 for deaths in Scotland and Northern Ireland are similar to England and Wales. This is particularly true in the case of ICD revisions 2-5, for which the alphanumeric ICD codes were converted into purely numeric codes in the dataset.

Census Records in England and Wales

In Week 3, England had the highest number of deaths involving COVID-19 with 7,956 deaths, followed by Scotland with 448 deaths, Wales with 447 deaths, and Northern Ireland with 182 deaths.
