Case Summaries

Augmented models, such as additions of wraparound services to core prevention programs, neighborhood resource centers, or additions of case management to after-school programs, may increase the likelihood that these services will be sustained.

Guide to the Fred Eggen Papers 1870

The interventions often fail to take into account the diverse sociocultural context and settings in which they will be implemented and are consequently not sustainable.

NIMH » Blueprint for Change: Research on Child and Adolescent Mental Health

Studies of the impact of organizational culture and climate on sustaining the fidelity of the therapeutic process and outcomes need to be conducted if science-based services are to be maintained within community-based agencies, schools, or health care settings. The court conducted a two-week bench trial in September 2001 and received evidence concerning the following questions: 1 whether MHSAA, by assuming controlling authority over interscholastic athletics from member schools that receive federal funds, is subject to Title IX; 2 whether MHSAA is a state actor for purposes of 42 U.

NIMH » Blueprint for Change: Research on Child and Adolescent Mental Health

Economic analyses by the RAND Corporation Karoly et al. Further, research on brain imaging to identify subtypes of diagnostic categories may have different treatment intervention implications.
