Guidelines for Investigating Chemical Process Incidents, 2nd Edition

Developing appropriate recommendations and then ensuring their resolution is the key to prevention of similar events from recurring, along with the sharing of lessons learned from incidents. The center for chemical process safety ccps was founded in 1985 to develop technology and management practices that mitigate or eliminate process safety incidents in the chemical and petrochemical industries since that time ccps has published more than 100 books and held dozens of international conferences each representing the most advanced thinking in process safety.
