AudiologyOnline Journal

As a dynamic and growing profession, the field of audiology will change over time as new information is acquired. It defines audiologists as independent practitioners and provides examples of settings in which they are engaged.

Audiology

A discussion of the various amplification options currently available for children with single-sided deafness, as well as practical advice for audiologists on what to consider when serving these patients. A panel discussion with leading experts in the field of Audiology exploring the lack of awareness of cochlear implants for adults, and the various barriers and facilitators to overcome this.

elicense

Audiologists provide information on hearing and balance, hearing loss and disability, prevention of hearing loss, and treatment to business and industry. Trumpet's wireless probes gives you total freedom when performing in-situ measurements. Rather, it is a broad statement of professional practice.

Scope of Practice

Counseling regarding hearing loss, the use of amplification systems, and strategies for improving speech recognition is within the expertise of the audiologist. Purpose The purpose of this document is to define the profession of audiology by its scope of practice.
