FDA's GAP's for fresh produce provide valuable guidance for use in the production and post harvest handling of raw agricultural commodities.

Food politics and development

HACCP focuses the processor on understanding his own process and the hazards that may be introduced during that process, and identifying specific controls to prevent, reduce, or eliminate the identified hazards. Perhaps for wine in some sense, but surely not for cement. Lee, Darin and Maria Jose Luengo Prado.

Conversely, several comments argued that HACCP is the appropriate food safety system for small producers because it can be implemented without being overly burdensome and forcing them out of business. In light of the record of this proceeding, FDA has concluded that a system of HACCP controls is necessary to prevent the spread of communicable disease via consumption of contaminated juice, and that the PHS Act provides the agency with the authority to establish such HACCP requirements for juice.

Because the preventive controls required by HACCP are essential to the production of safe food as a matter of design, the statutory scheme is benefited by agency access to records that demonstrate that these controls are being systematically applied. One comment cited a source that

estimated that food manufacturers are involved in less than 10 percent of foodborne disease outbreaks of known origin Ref. Such an outcome, it was argued, would be beyond the scope of section 402 a 4 of the act, one of the particular sections relied upon as authority for the regulation as a whole.
