

New evolutionary microeconomics - complexity, competence, and adaptive behaviour

Edward Elgar - The New Evolutionary Microeconomics : Jason Potts : 9781840645439

Description: -

-

Sermons, English -- Translations.
 Sermons, Danish -- Translations into English.
 Lutheran Church -- Sermons.
 Religion -- Philosophy.
 Blood covenant.
 Blood -- Religious aspects -- Judaism.
 Sacrifice in the Bible.
 Sacrifice -- Nigeria.
 Igbo (African people) -- Religion.
 Bible. -- O.T. -- Exodus -- Criticism, interpretation, etc.
 Church renewal -- Anglican Church of Canada.
 Anglican Church of Canada. -- Diocese of Ruperts Land.
 Dental Implants
 Dental Implantation -- nursing
 Dental Implantation -- methods
 Dental assistants
 Dental implants
 String quartets -- Interpretation (Phrasing, dynamics, etc.)
 String quartet.
 Haydn, Joseph, -- 1732-1809.
 France -- Officials and employees -- Recruiting.
 Local officials and employees -- France.
 Communism -- China.
 Chinese language -- Readers -- History.
 Theater
 Earthquakes -- New England.
 Gravity anomalies.
 Architectural photography
 Architecture -- Japan -- 20th century
 Construction industry -- Japan
 Architectural firms -- Japan

To achieve his aim, Potts brings together various bits and pieces of notions, ideas, theories and models, dispersed over many different disciplines. Ultimately the outstanding distinction of this book is the broad compass of the material and the coherent tapestry that Potts has weaved from it.

Microeconomics: Complexity, Competence and Adaptive Behaviour

I picked this book up and could not put it down, it is a fantastic read - a brilliant volume. He has covered a wide range of literature and integrated the diverse strands into a coherent argument.

Review of The New Evolutionary

Graph theory, complexity theory, chaos theory, self-organisation theory and the notions of genetic algorithms and dynamic efficiency all get a succinct, but clear coverage. . Jason Potts's New Evolutionary Microeconomics is at once an ambitious and imaginative piece of work.

Potts sometimes argues as if each mathematical formalism has unique ontological implications. I think this is a bit naïve. Loasby, University of Stirling, UK Read more.

The new evolutionary microeconomics : complexity, competence and adaptive behaviour (Book, 2000)
[me.stfw.info.cdn.cloudflare.net]

This challenging new book should prove timely and important for evolutionary and computational economists as well as those in the fields of managerial economics, business studies and marketing. This is taken to imply that the social environment needs to be taken into account right from the start. Potts makes clear why he believes that the future lies in multi-agent computer simulations.

New Horizons in Institutional and Evolutionary Economics Ser.: The New Evolutionary Microeconomics : Complexity, Competence and Adaptive Behaviour by Jason D. Potts (2000, Hardcover) for sale online

The book charts a research programme for evolutionary economics that encompasses the theory of dynamic efficiency and emergence in markets, a computational model of the learning and interacting agent, a competence based theory of the firm and the household, and, via a theory of expectations and plans, an agent-based foundation to macroeconomics. These economists stress that the social environment in which agents are embedded affects the ways in which agents think, argue, behave and interact with one another. Ultimately the outstanding distinction of this book is the broad compass of the material and the coherent tapestry that Potts has weaved from it.
