Archery

Mechanical sights can be affixed to the bow to aid in aiming. Possibly these were items of personal adornment, and hence value, remaining extant whilst leather had virtually no intrinsic value and would also deteriorate with time.

Michigan Archery

Some believe that the hand with the greatest dexterity should therefore be the hand that draws and releases the string.

Archery Parks

Proceedings of the British Academy.

Homepage

The and shouldered Khiam-points may well be arrowheads. Selfbows are made from a single piece of wood.
