Africa faces some serious environmental problems: Greenpeace

Lands turn to desert due to a number of reasons, but much of the desertification that is occurring around the world today is caused by human activity on lands that are extremely vulnerable to overexploitation and improper agricultural methods.

Africa faces some serious environmental problems: Greenpeace

The Coordinated Downscaling Experiment CORDEX of the World Climate Research Programme WCRP , is aiming to overcome these capacity challenges and is being employed on the African continent to improve understanding of the differential climate variability experienced between regions see Engelbrecht et al.

Water Resources: Agricultural and Environmental Issues

Abstract The increasing demands placed on the global water supply threaten biodiversity and the supply of water for food production and other vital human needs. Downstream, the untreated water is used for drinking, bathing, and washing, resulting in serious human infections and illnesses. **Water Availability** Both water scarcity and excessive water can impact health.

The Challenge of Environmentally Sustainable Development in Africa

Viewed October 9, 2017; World Water Assessment Programme.

Agricultural policies in Africa could be harming the poorest

When managing water resources, the total agricultural, societal, and environmental system must be considered.
