We favour those who choose to be guided by ethical values, who respect ecosystems and all their life forms.

When “Creatives” Turn Destructive: Image

While previous estimates focused on estimating the damage if average temperatures were to rise by 2°C, this report shows that many of the adverse impacts of climate change will come at the 1. The current top three uses of fresh water account for 95% of its consumption; approximately 85% is used for of farmland, golf courses, and parks, 6% is used for domestic purposes such as indoor bathing uses and outdoor garden and lawn use, and 4% is used for industrial purposes such as processing, washing, and cooling in manufacturing centres.

List of environmental books

Yet, while all of these problems have physical environmental manifestations, their causes - and their potential solutions - are invariably bound up with human attitudes, beliefs, values, needs, desires, expectations, and behaviours.
