Diabetes: Symptoms, Causes, Treatment, Prevention, and More

GDM is managed with meal planning, activity, and, in some cases, insulin.

Diabetes Meaning

Diabetes educators are found in hospitals, physician offices, managed care organizations, home health care and other settings.

Diabetes mellitus

Recognized Diabetes Education Programs diabetes self-management education programs that are approved by the American Diabetes Association. Also called simple or nonproliferative non-pro-LIF-er-uh-tiv retinopathy. The result is a slower and lower rise in blood sugar throughout the day, especially right after meals.

Diabetes Glossary

If you're overweight, losing even 7% of your body weight — for example, 14 pounds 6. Infections or wounds that are slow to heal If you have type 2 diabetes, your body may have a hard time fighting off infection. Many amputees have a second amputation within five years.

Diabetes: Symptoms, Causes, Treatment, Prevention, and More

The longer you have diabetes — and the less controlled your blood sugar — the higher the risk of complications.

DIABETES

What are the types of diabetes? Symptoms include abdominal, vomiting, rapid breathing, extreme lethargy, and drowsiness.

Diabetes Glossary

Sometimes referred to as ketone bodies. Family members share genes that make them more likely to get type 2 diabetes and to be overweight. But not everyone who has these autoantibodies develops diabetes.
