Though the world's nuclear arsenal is now than what it was in the 1980s 13,000+ versus 50,000+ , the United States and Russia, still holders of the world's two biggest nuclear arsenals, maintain an adversarial relationship. In this photograph, an unidentified man stands next to a tiled fireplace where a house once stood in Hiroshima on Sept. Drawing on resources from across the US and Canada, the facilities at Oak Ridge and Hanford focused on uranium enrichment and plutonium production.

Frustrated by a lack of progress, Bush had Marshall replaced in September by newly-promoted Brigadier General Leslie Groves. That's not as scary as it sounds—it simply means that the plug and the target would lose their destructive power before the bomb could actually go off. With Japan's refusal of calls to surrender, Truman authorized the bomb's use against the city of Hiroshima.

A different theme of the fallout era in popular culture was atomic armageddon. Since the bombings of Hiroshima and Nagasaki, people in the United States and around the world have reacted to the atomic bomb with joy, devastation, hope, fear, and many other emotions. The mushroom cloud would itself come to symbolize this early era of atomic fantasy.
