It was shown that the function of deformation might have all true components of geometry. From these premises it will follow, that the product xy will represent, in succession, the selection of the class Y, and the selection from the class Y of such individuals of the class X as are contained in it, the result being the class whose members are both Xs and Ys.

Leibniz's Influence on 19th Century Logic (Stanford Encyclopedia of Philosophy)

The estimation of a theory is not simply determined by its truth It also depends upon the importance of its subject, and the extent of its applications; beyond which something must still be left to the arbitrariness of human Opinion.
