Study IT networking and systems administration Our range of IT networking and systems administration courses will give you the practical skills you need to launch your career. Q: What is the numbering system for course levels? Modules of study are likely to include: Management in Healthcare Systems; Business; Economics; Managing Financial Resources; Strategic Management; Project Management; and HR Management.

## The Application of Computer in School Administration

Higher education is more than a college degree. Most schools in Manipur do not have the idea about the use of computer in school administration properly. However, the potential of technology has outstripped the ability of organisations to understand and make use of information.
