FinnGen research results integrated into Open Targets Genetics

FCAI supports SIGs in the organization of meetings, seminars, workshops, visits of foreign experts, communications, and other activities leading towards a more integrated ecosystem.

Research — FCAI

Introducing the new SBTi strategy Increasing ambition In 2018, following the release of the , the SBTi began a public consultation process that led to the review of our target setting framework and broader strategy. Each year, NSF receives more than 40,000 competitive proposals and makes about 11,000 new awards.

FinnGen research results integrated into Open Targets Genetics

Those awards include support for cooperative research with industry, Arctic and Antarctic research and operations, and U.

Breakthroughs in Medicinal Chemistry: New Targets and Mechanisms, New Drugs, New Hopes

FinnGen aims on one hand to provide novel medically and therapeutically relevant insights but also construct a world-class resource that can be applied for future studies. FCAI SIGs offer important contributions to the FCAI research and impact agenda and take advantage of FCAI results. Read more: FinnGen is a large public-private partnership aiming to collect and analyse genome and health data from 500,000 Finnish biobank participants.

International Team Targets Innovations in STEM Learning

Despite significant progress in recent years, the world is not yet on a trajectory that is consistent with the Paris Agreement and limiting warming to 1. This analysis feeds into the , which integrates a range of publicly available data to build and score associations between targets and diseases.
