### What Is Communism?

Definition of Communism A form of socialism, in which the means of production, resources, and property are owned and controlled by the egalitarian society, i. It has created societies where power is held by a small group that enslaves entire nations and where killing fields, gulags, and reeducation-through-labor camps become part of everyday life. Then I know people who sit at home all day watching TV, getting food stamps which is taken from me via taxes , and never contribute to their own welfare.

### communism

Instead, people would all work on making things better for each other. Capitalism breeds an aristocratic society where the rich can send their young to the best schools with the best educational resources and most expensive facilities. Communism developed as a theory after the Bolshevik revolution in 1917.

### Great Reset is corporate communism, and it's coming to America

While it had non-communist unions it was largely dominated by the Soviets. The problem with these Utopians is that they believe that whatever is done, however horrible in the past, is forgivable for the immediate and prosperous future. He cannot think about moving up as everyone is treated equally.

## **Communism Is Reborn with a New Name in America**

But Communism doesn't have to operate under a Democratic or Republican governmental platform, and neither does capitalism.
