The boy survived the transfusion. And first I tried to transfer blood from the jugular vein of one animal to the jugular vein of a second by means of

tubes between the two; but, seeing the blood clot at once in the tube and block its own passage on account of the slow movement of the venous blood, I soon began to try another way, and guided, as it were, by nature herself, I finally determined to transfer blood from an artery of one animal into a vein of a second ; and by this new device to extend the circulation of the blood beyond the boundaries prescribed for it. This is a reproduction of a book published before 1923.

LOWER, Richard (1631

This data is provided as an additional tool in helping to ensure edition identification: ++++ Tractatus De Corde. His accedit Dissertatio de origine catarrhi.
