Job openings and the Help

Help-Wanted Index Help-Wanted Index characterizes the volume of published advertisements in newspapers on hiring employees. However, since the end of 2012, a substantial discrepancy between the two series emerged: according to JOLTS data the level of job openings rose by 48 percent between the end of 2012 and the end of 2015, while the composite HWI suggests a far more modest increase in vacancies of only 4 percent over the same period unadjusted HWOL rose by 9 percent. We publish textbooks, journals, monographs, professional and reference works in print and online.

The Help

Clark, Monthly Labor Review, November 2004. The monthly HWOL data have been produced by the Conference Board since May 2005, replacing the Help Wanted Advertising Index of print ads, which was published from 1951 to 2008. Şahin, Aysegül, Joseph Song, Giorgio Topa and Giovanni L.

FRB: FEDS Notes: A Cautionary Note on the Help Wanted Online Data

The job openings data come from the and the unemployment rate comes from the. HWOL data contain the universe count of all ads posted online during a month, with a mid-month survey reference period e. Figure 3 illustrates our empirical strategy.
