## **Fur and Feather Works, LLC**

Our goal is to catch any problems before they become major ones.

### **Between Feather and Fur (Gryphon Melds, #1) by Angela Castle**

This heartwarming book is not only educational but gives kids and adults a wonderful sense of self-respect, self-worth and deep appreciation of belonging. For families that have to travel by airplane, it may be in their best interest to choose to board pets in a kennel.

**Fur and Feather Animal Assistance — A permanent residential facility for dogs and cats, designed for comfort, well being, and the study of animal behavior.**

The Melds are sort of a new to the genre of shifters.

### **Fur & Feather Stand Together**

We also felt it was important to feature a diverse array of people and animals in our illustrations, and in particular, to highlight how Indigenous youth and women of color are at the forefront of so many on the ground efforts to defend our communities and the earth from the impacts of climate change. While climate change may exist in the abstract for some of us, the harm wrought by climate inaction and environmental injustice has been clear for people of color and Indigenous peoples for a long time. Fur and Feather has provided homes to pets whose owners can no longer take care of them due to illness, death in the family, or financial crisis.

### **Grayson County Fur, Feather, and Friends Show & Contests**

But what starts as a small effort to solve this local problem grows, through stories and small acts of compassion, into a global movement of animals and humans, all standing up with and for each other. Completely the wrong words used in places.
