## Associate in Arts (A.A.) Degree

Upon completion, students should be able to exhibit first-hand knowledge of issues pertinent to the host area and demonstrate understanding of cultural differences. Upon completion, students should be able to design and implement normalized database structures by creating simple database tables, queries, reports, and forms.

## Participatory art and computers: identifying, analysing and composing the characteristics of works of participatory art that use computer technology

Topics include ethical systems; social change, values, and norms; cultural diversity; citizen involvement in criminal justice issues; and other related topics. Topics include Hinduism, Buddhism, Taoism, Confucianism, and Shinto. Emphasis is placed on content, terminology, design, and style.

## Courses

This course covers selected works in American literature from its beginnings to 1865. Emphasis will be placed on the fundamentals of router configuration, managing router software, routing protocol, and access lists. Upon completion, students should be able to perform basic diagnosis, measurement and repair of automotive engines using appropriate tools, equipment, procedures, and service information.

## Computer Programming

This course provides an in-depth study of current social problems. Emphasis is placed on integrating classroom learning with related work experience. Emphasis is placed on major theories and perspectives as they relate to the physical, cognitive, and psychosocial aspects of development from conception to death.

## **Courses**

Upon completion, students should be able to communicate spontaneously and accurately with increasing complexity and sophistication. Upon completion, students should be able to demonstrate appropriate safety procedures, identify and use basic shop tools, and describe government regulations regarding transportation repair facilities.

### **British Library EThOS: Participatory art and computers : identifying, analysing and composing the characteristics of works of participatory art that use computer technology**

Upon completion, students should be able to communicate effectively, accurately, and creatively about the past, present, and future. This course provides an overview of the basic concepts of communication and the skills necessary to communicate in various contexts. Topics include demonstrations of services, supervision, and entry-level student assessment.

## **Network Management**

This course introduces world history from the early modern era to the present. Emphasis is placed on experimentation in the use of drawing techniques, media, and graphic materials. Upon completion, students should be able to identify, analyze, and critically evaluate the philosophical components of an issue.
