## Synchronizing Demand and Supply of Agricultural Produce in India

In one of the large industrial parks Hawassa Industrial Park , close to 14,000 workers have been given paid leave, partly due to a fall in external demand.

## The impact of COVID

These regions largely coincide with the extensive cropping land system archetype , where large production gains could be achieved by closing yield gaps through nutrient and water management without necessarily promoting additional decline in biodiversity on the current or future farmlands, e.

## Projecting the impact of COVID

Indeed, production now needs to be significantly dictated by market requirements. Global food demand, productivity growth, and the scarcity of land and water resources: a spatially explicit mathematical programming approach.

## Global Demand for Food Is Rising. Can We Meet It?

Transport services are dominated by the performance of Ethiopian Airlines, which experienced a collapse in passenger transport due to the pandemic. Therefore, a drop in household income due to the economic downturn has a larger effect on food consumption in LDCs than in OECD countries.
