**Robert Palter, The Mystery of Matter by Louise B. Young**

ATLAS is a particle physics experiment at the Large Hadron Collider at the headquarters of CERN the European Organization for Nuclear Research near Geneva, Switzerland. It grounds ethics in the politics that derives from the communitarian nature of matter itself; and it speaks to the possibility of relationship to the matrix of all existence.

Is matter substance or form? Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. Lively, readable, and, at times, even shocking, this is a book for environmentally-minded and safety-conscious readers of the 1990s.
