Manic Depression: 10 Symptoms of Manic Depression

The difference is really quite simple, though. In some cases, mania may trigger a break from reality psychosis.

NIMH » Bipolar Disorder

The whole idea of having unipolar depression is that there would be no genetics of bipolar illness and the course of illness would be as described above.

Bipolar Disorder (Manic

Bipolar is the name that is often used interchangeably with.

Bipolar Disorder (Manic Depressive Illness or Manic Depression) Guide: Causes, Symptoms and Treatment Options

The severity of the depressive and manic phases can differ from person to person and in the same person at different times. Occasionally, bipolar symptoms can appear in children.

What's the Difference Between Depression and Manic Depression?

Thus, one could have 20 depressive episodes, and the diagnosis would be manic-depressive illness MDI.

Bipolar Disorder (Manic Depression)

Offer to join them at the appointment for moral support.

Bipolar Disorder (Manic Depression)

Some people with this illness may have to be brought to a hospital, even when they don't want to go. The hospital can also provide mood and

sleep stabilization and medication for their symptoms. Lithium and valproic acid should be avoided during the first three months of pregnancy, because they are known to cause birth defects.

Bipolar Disorder (Manic

Therefore, it is important for both friends and family members to recognize the resurgence of certain symptoms when they appear immediately.
