

# Laser-induced damage in optical materials: 1995 - 27th annual Boulder Damage Symposium : proceedings : 30 October-1 November, 1995, Boulder, Colorado

**SPIE--the International Society for Optical Engineering - 27th Annual Boulder Damage Symposium: Laser**

Description: -

-

Vermeer, Johannes.

Electricity -- Pricing

Electric utilities -- Rates

Electric utilities -- Competition

Electric industries -- Competition

Ballistic missile defenses -- United States -- Technological innovations.

Strategic Defense Initiative.

Thin films -- Effect of radiation on -- Congresses.

Surfaces (Physics) -- Effect of radiation on -- Congresses.

Optical materials -- Effect of radiation on -- Congresses.

Laser materials -- Effect of radiation on -- Congresses.

Laser beams -- Congresses. Laser-induced damage in optical

materials: 1995 - 27th annual Boulder Damage Symposium :

proceedings : 30 October-1 November, 1995, Boulder, Colorado

-

Politics in Asia series

Proceedings of SPIE--the International Society for Optical

Engineering -- v. 2714.

SPIE proceedings series -- v. 2714 Laser-induced damage in optical

materials: 1995 - 27th annual Boulder Damage Symposium :

proceedings : 30 October-1 November, 1995, Boulder, Colorado

Notes: Includes bibliographical references and author index.

This edition was published in 1996

Military Standard 1246C can be used to provide overall particulate, and molecular film, or nonvolatile residue cleanliness scales. A Monte Carlo model was developed to investigate the distribution of laser damage threshold LDT results obtained via the Damage Frequency Method DFM.

**27th Annual Boulder Damage Symposium : Laser**

Babu, Sivakumar and Murthy BRS, GL 2009 In: National Workshop on Forensic Geotechnical Engineering FGE , IISc, 12 Sept. The gratings were examined dynamically for sparking and breakdown. Although a great variety of different test facilities was employed by the round robin partners, a good agreement of the absorption values was observed for the wavelength of 10.

To the authors' knowledge, no data exists describing the multi-billion shot accumulative exposure effect Q-switched, 4 ns pulses have on intracavity optical components. Highly reflective coatings and polarizing beam splitters are generally designed with alternating layers of high and low index of refraction materials, with the thickness of each layer corresponding to an optical path length of a quarter of a wavelength.
