Management of private tubewells in a conjunctive use environment : a case study in the Mananwala Distributary Command Area, Punjab, Pakistan

Massive resources of labour and materials were mobilised to construct large projects in a very short time.

REDUCING CARBON EMISSIONS THROUGH IMPROVED IRRIGATION MANAGEMENT: A CASE STUDY FROM PAKISTAN, Irrigation and Drainage

Bilharzia or schistosomiasis is prevalent and spreading, through its water-snail vectors, in Africa and South Asia. The scenario of present-day irrigation is, having ended a dramatic period of evolution through the twentieth century upheavals in geopolitics. For a long time there was confusion as to which organization had the mandate in this regard.

Full text of Journal Of Agricultural Economics Vol.

This directive includes specific provisions for the development of pricing policies that ensure an adequate incentive for users to use water efficiently and all adequate recovery of the costs of water services by the main water users agriculture, industry, households. This has not been possible mainly because of the diminishing rate of growth of cropped area.

Javed's Blog: Ground Water Resources of Punjab, Pakistan

Virtual water and self-sufficiency It is common amongst developing countries for the stated aims of national policy to include self-sufficiency in food production, or at least import substitution of staple foods. However, small schemes for paddy can nevertheless be run successfully with continuous flow, especially if the source of water is a run-of-river diversion weir and there can be no attendant risk of wastage of stored water as in a tank, nor of power as in a lift scheme. But the times are changing, and the need for more control at all levels in the system is becoming more pressing.

Groundwater modelling for need assessment of command scale conjunctive water use for addressing the exacerbating irrigation cost inequities in LBDC irrigation system, Punjab, Pakistan

The recent changes of the hydrological roles of glaciers and snow, and the most likely changes of those under future climate change are analyzed. Explores the relationship of water distribution rules to water distribution performance in the Tambraparani Irrigation System in India. The recent history of irrigation is none too inspiring.

Department of Water Resource Development & Management, Indian Institute of Technology Roorkee

The Indicator was applied and tested in nine case studies in Africa and Asia.

Muhammad Usman

This report further highlights how a focus on agricultural water productivity has brought greater attention to critical water scarcity issues, and the role of agricultural water management in supporting broader development objectives such as increasing agricultural production, reducing agricultural water use, raising farm-level incomes, and alleviating poverty and inequity. Drainage problems that are not really drainage problems at all because they are created by over-irrigation, can be avoided without recourse to expensive tile drainage. The canal irrigation network that was ideal for 24-hour continuous irrigation is hopelessly inadequate for the flexible scheduling now required by private farmers.
