

# Agent and multi-agent systems - technologies and applications : second KES international symposium, KES-AMSTA 2008 : Inch'ŏn, Korea, March 26-28, 2008 : proceedings

Springer - KTH

Description: -

-  
Distributed artificial intelligence -- Congresses  
Intelligent agents (Computer software) -- Congresses  
Agent and multi-agent systems - technologies and applications : second KES international symposium, KES-AMSTA 2008 : Inch'ŏn, Korea, March 26-28, 2008 : proceedings

-  
Société Internationale de Recherches Interdisciplinaires sur la Renaissance -- 26  
Lecture notes in artificial intelligence  
Lecture notes in computer science -- 4953  
Agent and multi-agent systems - technologies and applications : second KES international symposium, KES-AMSTA 2008 : Inch'ŏn, Korea, March 26-28, 2008 : proceedings

Notes: Includes bibliographical references and index.  
This edition was published in 2008

It covers: Why and how to develop and experimentally test the computational mechanisms for learning and evolving sensory-motor control behaviors in autonomous robots How to design and develop evolutionary algorithm-based group behavioral learning mechanisms for the optimal emergence of group behaviors How to enable group robots to converge to a finite number of desirable task states through group learning What are the effects of the local learning mechanisms on the emergent global behaviors How to use decentralized, self-organizing autonomous robots to perform cooperative tasks in an unknown environment Earlier works have focused primarily on how to navigate in a spatially unknown environment, given certain predefined motion behaviors. Springer, IFIP 13th International Workshop on Semantic and Social Media Adaptation and Personalization, Zaragoza, Spain, September 6-7. In this method, an agent learns how to make a concession to an opponent.

Proceedings, Part I 158 , , Lakhmi C. As such, the book covers topics such as software agents, multi-agent systems, agent modeling, mobile and cloud computing, big data analysis, business intelligence, artificial intelligence, social systems, computer embedded systems and nature inspired manufacturing, all of which contribute to the modern digital economy. In Proceedings of the 7th IFAC International Conference on Fieldbus Systems and their Applications FET-2007 , pp.
