Now those statements seem to be pretty strong indicators that we need to look at this issue seriously and understand.

Design Practices for Military EMC and Environmental Compliance

The point I was trying to make is there is the potential certainly for hardening these repeater stations, along the lines of the protocols that we have developed for military systems. I hope that I have been able to give you an idea of the phenomenology associated with EMP and the qualitative effects on our civilian infrastructure.

Threat Posed by Electromagnetic Pulse (EMP) to U.S. Military Systems and Civil Infrastructure

His entire concern has to do with RF conventionally generated RF weapons that is, conventionally explosive generated RF weapons; and he discusses that at great lengths.

Electromagnetic pulse

If we come into contact with a rogue nation in possession of just a very few nuclear weapons, perhaps just one, our adversary may or threaten to use one of those weapons to blind our military or to damage our economy or that of an ally. With that, I will turn to Mr.

Fiber Optic Aircraft Systems Electromagnetic Pulse (Emp) Survivability

If you were going against the American civilization itself, again, the largest damage you could expect to see by far is that associated with EMP laydown.
