### MRC Rubber

The sector is clearly proved as employment generator so far in the country. The United States in particular developed a synthetic rubber industry almost overnight, achieving a production of 800,000 tons per year. Malaysia contributes to 46 percent of total rubber production in the world and produces about 1-5 million tons of rubber annually.

### Singapore/Malaysia Rubber

The principal rubber-producing countries are Thailand, Indonesia, and Malaysia, followed by the Asian producers China, India, the Philippines, Vietnam, and Sri Lanka and the West African states of Nigeria, , Cameroon, and Liberia.

### Department of Statistics Malaysia Official Portal

Thus, indirectly, rubber helps in promoting the system of modern transport and communication.

### Rubber

Recently in a press conference the Minister of oil and plantation, Malaysia has announced to go for rubber plantation in Myanmar. Heavy rainfall above 200 cm. The tapping time is also programmable and has a short tapping length of 1 inch.
