“I can change your opinion on that”: Social constructivist whole class discussions and their effect on scientific reasoning, Research in Science Education

Even with this norming process, IQ can change over time. It seems that this would be wrong.

Educational Studies in Mathematics

The bigger problem is conceptual.

Cognitive acceleration

Eugene, OR: Information Age Education.

Math Maturity v1

Even if all external and internal factors were propitious and definable it would still be difficult to define failures to achieve in absolute terms. If so, then perhaps educators would want to identify these varying characteristics in their students and better individualize programs of study to meet there varying students. D studies at the Institute of Education in London.

Math Maturity v1

Self-regulated learning: Where we are today.

Math Maturity v1

This analysis showed that the intervention effect was lower when a standardized test was used for evaluation instead of an unstandardized test.
