Also, beginning in the 1930s and 1940s, a multiple-use philosophy developed among some land managers and public land users.

Growing Wild: Crested Wheatgrass and the Landscape of Belonging

Medicine Lodge Resource Area and Targhee National Forest Idaho and Wyo. Cowles explained vegetative succession in a four-part article that appeared in the Botanical Gazette between February and May 1899. Dewey recognized 23 Kay Asay and Doug Johnson, personal communication, 22 February 2008, Logan, Utah.

BPC Meetings, Agendas, Minutes & Policies: Board of Pesticides Control: Maine ACF

They trample down the native forbs and shrubs and cactus. David and Margaret Evans sold at least thirteen properties to the land utilization project between January and April 1938.

Federal :: Revised Land and Resource Management Plan, Caribou National Forest, ID

This thesis utilizes these papers in discussing various aspects of the history of crested wheatgrass and in placing the discussion of crested wheatgrass into the context of changing values and landscapes after 1980. This system provides standards that apply more directly to specific sites: native-plant communities have a different set of standards than reseeded areas and areas that are dominated by exotic plants other than reseeded species. Cambridge: Harvard University Press, 1970.

BPC Meetings, Agendas, Minutes & Policies: Board of Pesticides Control: Maine ACF

Samaran farmers planted their fields with wheat, barley, corn and potatoes and they raised cattle, swine and poultry. Objection issues must be based on previously submitted, timely, and specific written comments regarding the proposed project unless based on new information arising after designated opportunities.
