The animal testing of cosmetics and toiletries and the REACH dilemma

These rights tend to be the only thing standing in the way of a ridiculously large and profitable industry, and tend to get tossed out.

Animal Testing & Cosmetics

Even though animal testing may tell us how the use of these products may affect humans, the testing process itself causes excess harm to people and the environment. This stance is in government requirements in the UK and by the American Veterinary Medical Association, The Society of Toxicology and the Howard Hughes Medical Institute in the US and the majority of institutions are subject to a code of ethics that require animals to be treated humanely and for any pain and suffering to be minimized.

Environmental studies required for REACH include the use of fish. From in vitro experiments to in vivo and clinical studies; Pros and Cons.

Animal Testing and Alternatives

Ban the marketing of finished products tested on animals.

Animal Testing and Alternatives

The US and China do not, at the present time, have such bans.

Animal Testing in the Cosmetics Industry

We continuously participate in scientific and regulatory communities in order to stay current on ingredient and product safety. The study also provides recommendations in the form of alternatives that protect animals from cruelty and may benefit the different stakeholders and the society at large.

The animal testing of cosmetics and toiletries and the REACH dilemma

Others show animals that are distressed but only because they have been breaking in to their laboratory with harsh lights and loud noises. A choice that will finally open the door of this gigantic market for all the cosmetics brands that had chosen to give it up to stand by their conviction.

Which animals are used in cosmetics tests?

The sale of cosmetic ingredients tested on animals outside the EU using methods that have been replaced within the EU was also banned.
