Elevator

Home elevators installed on an interior wall can require relocating wiring, air conditioning ductwork or plumbing. We look forward to working with you on this journey. Premier Industrial and Commercial Elevator Rentals With over 40 years of rack and pinion elevator experience, McDonough Elevators is one of the largest vertical access providers in the United States.

Residential Elevators

Constructed with polycarbonate and aluminum materials, this lift system is basically a tube in a sealed vacuum. The company manufactures and sells both traction and hydraulic elevators for use in the home. We are committed to ensuring customer satisfaction by delivering timely response to unscheduled service calls, a 24 hour service hotline, and regular equipment performance reviews.

Home and commercial elevators for sale and for service

Mechanical floor selectors were common in relay-driven elevators installed before around 1985. Yes, a home elevator is safe, as long as you use the equipment as it's intended and follow the product safety guidelines. The opposite happens as you go down — pressure below is minimized, forcing the elevator to go down.

Elevator Wiki

A glass elevator also fits ideally into upscale homes.

Elevator Wiki

Stannah Elevators are great for consumers who have difficulty managing the stairs in their home due to aging, pain, limited mobility or disability. Note that you can also get a free copy of our catalog. This type of elevator can only travel a distance of 250 feet with speeds of up to 500 feet per minute.

Residential Elevators

What Is the Minimum Size of an Elevator? Elevators for the home also must meet state and local code requirements and pass those inspections. We also offer part sales, maintenance packages, and refurbishments on permanently installed industrial and rack and pinion elevators. We use our expertise to provide turnkey equipment rentals with our fleet of construction hoists, transport platforms, and mast climbers.

Country Home Elevator & Stair Lifts

No hydraulic oil is used, and traction elevators tend to use one-third of the power that hydraulic systems need.

Residential Elevators

Helping out Elevatorpedia Elevatorpedia needs your help creating new articles. Please note that these are interior shaft dimensions that do not include the thickness of the shaft walls. Our hydraulic drive system has a capacity of up to 1,000 lb.
