Minister of Supply and Services - 7 Public Health Issues Causing Concern in 2019

Typical Metrics to Track	
Leading Indicators of ROI	In-line & Lagging Indicators of ROI
<ol style="list-style-type: none"> 1. ER frequent flyers/1000 members Members with more than 8 ER visits in the last year represent opportunities for utilization management 2. % Members likely to engage vs actual This statistic, combined with other metrics, can drive strategies to more effectively work with the population 3. Member show rate Decreases in show rates often indicate engagement strategies need to be modified to demonstrate better value to the member 	<ol style="list-style-type: none"> 1. % Spend under Management Medical and Rx spend attributed to members engaged in care management programs compared to overall paid amounts. Too small a share may indicate that there are opportunities for further engagement or that potentially the wrong members are engaged. 2. Savings associated with participants vs non-participants In a disease program, successful clinical interventions should result in participant costs changing at a lower rate than a control group of non-participants 3. Weighted case load per nurse Adjusting for the difference in workload by nurse for differences in average number of comorbid conditions, ED, age and other barriers provides more accurate insight into productivity 4. Risk scores of the participants As the population improves in health the aggregate risk score should go down, adjusted for changes in demographics 5. Provider attribution rate Higher attribution rates improve the likelihood of gap closure and partnership with physicians

The Population Health Model (POHEM): an overview of rationale, methods and applications

· Finally, as noted above, it is essential that this undertaking build on the successes of existing organizations, such as the Canadian Institute for Health Information CIHI and the Canadian Council for Health Services Accreditation CCHSA.

Creating conditions for Canadian aboriginal health equity: the promise of healthy public policy

Third, there are many areas of health literacy that remain unexplored. Changing the environment requires informed decision making about urban design, land use, transportation, and political and social systems and their relationships to health outcomes.

Chapter 2. Other Models for Promoting Community Health and Development

Canadian Paediatric Society: Facilitating discharge home following a normal term birth. This option also presents a positive environmental impact from reduced vehicle emissions.

How to Gradually Improve Health in Developing Countries

Speed of delivery 26% and the cost of a stamp 11% were viewed as less important. It can take some detective work and to. SPSS was used for all statistical computations.

The Population Health Model (POHEM): an overview of rationale, methods and applications

This three-minute motion graphic video explains how social, economic, and environmental conditions can create health inequities and how these inequities can affect health disparities. Social action can be used to help raise awareness of issues and to increase community participation in efforts to address them. However, given its very low unit cost, it contributes marginally to the overall financial health of the corporation.

7 Public Health Issues Causing Concern in 2019

Hawe P, Noort M, King L, Jordens C. Evans WK, Wolfson M, Flanagan W, Shin J, Goffin JR, Asakawa K.

Population Health Management Solutions and Strategies

Once you have chosen your audience, invite media representatives to become involved with the planning, implementation, and evaluation of your media campaign. The implications of these findings are that health literacy is not an issue only for clinicians serving urban or poor populations, but that low health literacy is a widespread problem in many communities. Production of this resource has been made possible through a financial contribution by Health Canada prior to the announcement of the establishment of the Public Health Agency of Canada on September 24, 2004.

The Health of Canadians: The Federal Role

Contemporary research has clearly demonstrated the relationship between population health status and the multiple determinants of health. Where systematic differences in health are judged to be avoidable by reasonable action they are, quite simply, unfair.
