Motivations for Pursuing Cross

In rural areas, percentage share in total homogamy is high for the illiterate 34 percent out of 50 percent in the first marriage cohort.

1. Background

These studies attest to the benefits of increased schooling for economic outcomes of individuals, and to the likely echo effects on their children. Download reference in González, M. Richer countries both inside and outside the region are encouraged to help resource-poor countries improve their educational systems and collect data on their progress.

Education and childlessness

Consensus and Conflict: Essays in Political Sociology.

Sociology Midterm Flashcards

Children in impoverished and isolated areas often lack ready access to urban labor markets in which educational credentials directly affect employment. After controlling for the opportunity structure on the platform, the preference for similar educated others is the most important factor, particularly among women.

1. Background

For example, in Latin America and China, both poverty and non-enrollment are concentrated in poor rural settings where returns to education tend to be low Lopez and Valdez, 2000; Piazza et al.

Motivations for Pursuing Cross

In 1970, unmarried people made up 28 percent of the adult population. Countries in Europe also show a great deal of variation in the proportion of women in marital unions. Although their small population sizes often makes them invisible even in disaggregated, subnational data, the limited evidence on the various highland populations in the region suggests that their fertility remains high and stands out from the general transition in the region Gray et al.
