Recent Burns Articles

This program provides emergency burn care and burn referral education to local emergency department colleagues in an effort to standardize early burn management and referral.

Burns

Use the time away to recharge your batteries and pursue other methods of recovery. Inappropriate initial treatment or delay of initial treatment may exert adverse effects on the subsequent treatment and course. These changes may be in the types and amount of food, how often a patient eats, and how food is eaten for example, at a certain temperature or taken with a straw.

Nutrition in Cancer Care (PDQ®)

A peripheral venous catheter is a thin, flexible tube that is inserted into a vein. Intramuscular is not recommended in patients with burn injuries.

Publications

Updated guidelines for the diagnosis and treatment of gastroesophageal reflux disease. Oral glutamine may reduce the severity of diarrhea.
