Captured near Nashville, TN on December 16, 1864, during the. .

Time Line

We had reached the place tired and dusty and dirty. Since virgin longleaf pines were fairly evenly distributed within the longleaf pine forests, since resin from longleaf pines and felled pines were transported convergently to the camps, present-day areas of smaller-diameter, new-growth longleaf pines, or areas of less density of trees among areas of greater density could potentially be used to predict approximate locations of previously-undocumented turpentine or logging camps.
