It became the common sense of the era that adolescent girls were fundamentally motivated by their Oedipal needs, dependent upon paternal sexual approval, and interested in their fathers' romantic lives. Theoretically sophisticated and compelling in its close readings, McLennan's book moves our understanding of literary adolescence into its own maturity. Contrary to the generally accepted view that teenagers grew more alienated from adults during this period, Rachel Devlin argues that postwar culture fostered a father-daughter relationship characterized by new forms of psychological intimacy and tinged with eroticism.

Feminine Adolescence and Transgressive Materiality in the Films of Lucrecia Martel

A must for historians, feminists, and anyone else interested in the nuances of how fathers and daughters relate.
