### Smart Policing: Top Five Policing Innovations Shaping the Future

Consequently, the growing number of psychologists working with law enforcement argues for psychology to have an even greater influence on public policy and the delivery of police services in this country. One consequence of this overstretching is that training opportunities for officers are increasingly limited, with newer recruits — who often make up the frontline of policing — suffering the most for this lack of opportunity. The book should draw attention to the often unrecognized and valuable contribution that mainstream psychology can make to the knowledge base underpinning a wide variety of policing practices.

The introduction of the Police and Criminal Evidence Act in the UK forced the police force to examine their interviewing techniques, and to look to academics for help with this training.

### Psychology and Policing in a Changing World by Peter B. Ainsworth

The biggest increase occurred in Australia and New Zealand, a remarkable increase of 9. And the Department of Justice recently issued a final from the President's Task Force on 21st Century Policing that drew from research including the psychological literature, he says. And the climate that develops can be transformative.

And, of great importance, involve all employees in establishing operational guidelines and planning and keep them informed honoring their experience, knowledge, motivations and support for it helps the organization many times over. Police and law enforcement agencies across the country are driving the change, pioneering creative ideas, adapting to changing contexts, and incorporating insights from officers and community partners.

### What the Police Could Learn from Psychologists

Why are people's fears of crime often greater than their level of risk might justify? Society has grown more complex and confounding in its very nature. Police killings of unarmed black citizens makes us question the integrity of our police forces, while retribution killings of innocent police officers make us fear for their safety on the job. Following the NYPD study, the next major attempt to test the effectiveness of implicit bias training on police is work being done by Lois James, at Washington State University.

### **How can psychology improve policing?**

In order to change behavior, you had to address driving and restraining forces. Differences by region are striking.

### **Policing in black & white**

Yet, there is some hope. Pointing towards future directions and a reimagining of leadership in the police, this is an accessible, stimulating and essential text for policing students and valuable reading for current leaders and those interested in policing, criminology and leadership.
