## Florida Power Corporation, Residential Load Management

Cumulative Radiological Radiation doses to the public and plant workers would remain below NRC and EPA radiation protection standards. Currently, FDEP has the authority to review all Federal licenses for coastal zone consistency with Section 307 of the Coastal Zone Management Act. Net metering is the system that utilities use to credit solar energy system owners for the electricity produced by their solar panels.

### RLM

Discharge canal temperatures would be moderated by reducing power at either CR-1 or CR-2 in order to comply with the site's NPDES permit. According to the 2010 census information, there were approximately 14,722 vacant housing units in Citrus County.

### RLM

Designating EFH is an essential component in the development of Fishery Management Plans to minimize habitat loss or degradation of fishery stocks and to take actions to mitigate such damage. The NRC used information from FPC's license amendment request for the EPU, consultation with National Marine Fisheries Service NMFS, the FES, and SEIS-44 to prepare the EA for the proposed EPU. Radioactive Solid Wastes  
Radioactive solid wastes include solids recovered from the reactor coolant systems, solids that come into contact with the radioactive liquids or gases, and solids used in the reactor coolant system operation.

### FSEC

Cumulative socioeconomic impacts from the proposed EPU and continued operation of CR-3 would occur during the spring 2013 refueling outage. As regulated by the current CR-3 NPDES permit, the plant periodically adds chlorine in regulated quantities to control biofouling organisms.
