Why Does the Muslim World Lag in Science? :: Middle East Quarterly

Estrabón or Pomponio Mela furnished chorographic models that were followed and esteemed time and again from the 16th to the 18th centuries; moreover, the information which these authors -as well as other authors of antiquity and of the Middle Ages- provided, and also itineraries and accounts of journeys, were also useful, after due criticism and authentication, in constructing the map and developing the description of the earth's surface, more particularly to the benefit of historical geography. The resonance of the Historical Essay concerning the Progressive Development of the Idea of the Universe, which was published in Alexander de Humboldt's Cosmos 1845-1862 11 , and the development of physical geography,

brought to these histories the evolution of ideas about the physical structure of the world and about the interrelationship between different natural phenomena. He believed philosophy must be taught its true purpose, and for this purpose a new method must be devised.
