If oceans these days are absorbing heat as part of a cycle, that surely means that the warming of the 80s and 90s so relied on by Warmists was in large part due to ocean giving off heat. We consider incorporating more general dependence structures, through the use of the correlation integral as in the BDS test, as a means to refine the choice of candidate copulas in an empirical situation. Addendum: The above mentions no names of individuals, who have contributed to this literature.

This research gained support for HBS that enabled the institution to survive, develop and prosper. The model is a more general one, in the sense that the fixed discount factor economy is nested as a special case. A classic psychology study in the 1970s had two groups of undergraduates read stories about a woman.
