

Experiment and theory in physics.

- - Experiment and Theory in Physics by Max Born

What makes a good class long (2 hr)
experiment? (Student Responses Last Class)

- Collecting data not just observations
- Visual representation of setup of apparatuses (diagram)
- Time with interaction with the lab attendant (familiarity with the lab)
- Prior discussion between the lecturer and the students
- Enough apparatuses should be available (workstations can help)
- Motivation in the form of fair marking
- Instructions given should match with the time allowed
- Apparatus should be tested before class begins
- Apparatus should be appropriate for the experiment
- Relevant to the program of the learners (exams)
- Having enough knowledge about the apparatus

Description: -

-

Trials (Fraud) -- Japan.

Consumer protection -- law and legislation -- Japana.

Canvassing -- Law and legislation -- Japan.

Direct selling -- Law and legislation -- Japan.

Physics -- Addresses, essays, lectures. Experiment and theory in physics.

-Experiment and theory in physics.

Notes: 6
