‘Abolish racist policy’

Inland, the land is rough, predominantly forested, hill country. Work is underway to increase the number of discounts available outside the main cities, and meeting with local business associations and Chambers of Commerce to find more business partners and explore other opportunities to develop the programme.

Waikura

Type material and new specimens of the five previously described architectonicid species from Chile are described and figured for comparison. More information on the types of schooling available in New Zealand and what qualifications are offered there can be found on the School System page.

Saccella

Columella has a weak tooth at the top. Only a quarter of young people in the Gisborne region have this qualification.

Borsonella sinelirata

Early childhood education There are just over 70 Gisborne options for early childhood education in the Gisborne region.
