School of Nursing < The University of Kansas

Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the adult-gerontology primary care nurse practitioner practice. Prerequisite: , , or consent of instructor. Communication strategies for informing, guiding, and persuading clients, health care providers, payers, and other stakeholders to advance program and project development are discussed.

Interdisciplinarity

Under the mentorship of an active nurse researcher the student designs and conducts a research project and participates as a member of a research project team.

School of Nursing < The University of Kansas

Fundamental principles of the research process and models for applying evidence to clinical practice will be explored.

School of Nursing < The University of Kansas

Prerequisite: or consent of instructor. Evidence-based brief psychotherapeutic intervention frameworks including psychotherapy are applied to individuals, groups and families across the life span. The focus of this course is ongoing acquisition of CNS competencies: direct care, consultation, systems leadership, collaboration, coaching, research, and ethical decision-making related to patients, families, and patient populations.

Interdisciplinarity

Students are introduced to a model of scholarship that includes discovery, integration, application, and teaching. This course is the first of three practicum courses.

School of Nursing < The University of Kansas

Human Resources and Workforce Development. Advanced practice competencies incorporate the health promotion, health protection, disease prevention, and management focus of the family nurse practitioner practice. Prerequisites: Corequisite: , or consent of instructor.
