The results show that a weak decoupling effect is mainly found between the DHEB and GDP in the Jing-Jin-Ji urban agglomeration from 2004 to 2016.

#### **Qing dai Jiangxi cai jing song an yan jiu = (2005 edition)**

If the original book was published in multiple volumes then this reprint is of only one volume, not the whole set.

The author introduced Correlation analysis, Co-integrated relationship and Granger causality test in metrology analyses to further research the relationship between urban construction land changes and driving forces. However, research regarding the Chinese herbal products CHPs that should be used at different periods of treatment is still lacking. The increase in the DHEB in 2004—2016 is largely driven by the growth of the district heating area and population, while the heating energy intensity negatively contributes to the increase.

We analyzed the dynamic relations between ESVs and the economy indicated by the gross domestic product, GDP by introducing the elasticity indicator EI , which reflects the growth synchronism between the two, and the ecosystem service load ESL , which reflects the ecological efficiency of economic growth. The absolute difference between two datasets shows the same seasonal behavior with NO2 variation, which is most striking in the winter 0.
