## Biological Monitoring

Introduction The purpose of this chapter is to provide guidance to OSHA Compliance Safety and Health Officers CSHOs and to the industrial hygiene community on the potential for skin exposure to chemicals in the workplace and the available means of assessing the extent of skin exposure. Other PPE for the reduction of static electric discharge includes conductive gloves and electrostatic dissipative ESD footwear without metal eyelets. It entails measurement of a chemical determinant in the biological media of those exposed and is an indicator of the uptake of a substance.

## ToxTutor

Toxicokinetic and toxicodynamic information is taken into account when establishing the BEI ®; thus, some knowledge of the metabolism, distribution, accumulation, excretion, and effect s is helpful in using the BEI ® effectively. The hand is then dipped in the solution and shaken a specified number of times to recover the contaminant from the hand.
