The New Urban Agenda: Key Commitments

This will require public education and behavioral change.

Sustainable urban development: it's time cities give back

These approaches could serve as a model for housing finance elsewhere in the Caribbean especially for households unable to access funding from formal financial institutions.

Goal 11: Sustainable cities and communities

This requires several things, such as creating career and business opportunities, safe and , and building resilient societies and economies. In this context, Caribbean Small Island Developing States have embraced Sustainable Development Goal 11 in pursuit of creating inclusive, safe, resilient, and sustainable cities as articulated in various governance, spatial, socio-economic, and environmental policies. In spite of the high success rate of private developers to deliver housing, they are unwilling to build houses for low-income families even if project subsidies are offered.

Five ways to make cities more sustainable and resilient

High levels of water wastage runs counter to SDG 6 on the sustainable management of water resources and as note, water security is a critical issue facing SIDS given climate change and increasing droughts they face now and in the future. Urban planning can accommodate a thriving informal urban economy through the designation of space to render the activities of this sector productive and profitable.

Five ways to make cities more sustainable and resilient

But what does that mean? That is, most of the raw materials a city absorbs are not generated from inside the city itself but rather from the rest of the planet. Moreover it provides housing, mobility, water and sanitary infrastructures, and it represents the physical context for social interactions as well as economic development at the micro-level.
